

7 NOV 1977

MEMORANDUM FOR: Walter Elder
Executive Secretary, NFIB

FROM : Acting CIA Member, NFIB

SUBJECT : Definitions Requested by the Senate
Select Committee on Intelligence

REFERENCE : NFIB-24.1/16, dated 26 October 1977

1. As Acting CIA member, NFIB, I concur in the definitions as presented in your referenced memorandum. I would, however, like to suggest a few modifications.

2. In the definition of a National Intelligence Estimate, I prefer use of the word "abroad" to the newly substituted phrase "in the foreign environment".

3. Executive Order definition of "foreign intelligence" and "foreign counterintelligence" apparently have changed again slightly and these changes should be incorporated. I suggest the following definitions for these:

FOREIGN INTELLIGENCE (FI): The product of the collecting, processing and analyzing of information relating to the capabilities, intentions and activities of foreign powers, organizations or persons, but not including foreign counterintelligence except for information on international terrorist activities.

FOREIGN COUNTERINTELLIGENCE: Information gathered and activities conducted to protect against espionage, and other clandestine intelligence activities, sabotage, international terrorist activities or assassinations conducted for or on behalf of foreign powers, organizations or persons, but not including personnel, physical, document, or communications security programs.
